Your guest's experience starts in the car park

Take it to the next level with NaviParking

1 Digital ticketing to enhance your guest's experience

2 Comprehensive parking management software

**3** Full control and transparency of parking operations

4 Modular solution, tailored to individual needs
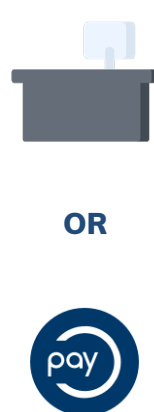

How does digital parking work?

ENTRY

The camera lets every guest into the car park until the space limit is reached

The guest enters the car park and parks in the selected space

EXIT

The reception validates the parking fee for hotel guests according to the established terms and conditions

OR

Rotary customer pays in NaviPay and leaves – maintenance free

IMPLEMENTATION CONSULTING

We provide consulting services on the operation of car parks. We will advise you on how to modernise your car park infrastructure, optimise the use of space, and show you what elements to consider when planning the construction of a modern car park.

EVENT MANAGEMENT

We know that managing the car park during an event at the hotel is a major challenge. Our solution helps you plan your parking demand. All you need to do is enter the number of cars you expect in a given time slot into the system, so event participants gain entry to the car park with a digital ticket.

Digital tickets
for your guests' convenience

The digital ticket is a modern solution that replaces the paper parking ticket. Not only does it make your guests' stay more convenient, but it also gives you full control and transparency of your car park operations.

50% cheaper than solutions from other companies

Non-invasive integration into existing systems

Dedicated transaction management system

License plate recognition security cameras

CLEAR REPORTS

The system gives you access to detailed data on the operation of your car park. Reports give you information on the number of transactions made, revenue generated or car park occupancy in a selected time period. Full data transparency allows for more efficient parking management.

MONETISATION

Digitising the car park is not only a convenience, but also an opportunity to generate additional revenue. Our solutions open your parking spaces to the public so you can make money from them. You decide how many places you want to offer. The process is completely secure and digitally operated.

ELECTRIC CAR CHARGERS

If you want to provide electric car chargers in your car park, we can guide you through the process smoothly. Our specialists will advise you on how to implement and make the chargers available for use, and how to generate revenue from them.

RESERVATION OF THE CAR PARK FOR GUESTS

Your guest's experience starts in the car park. That's why you need to get this stage right. The digital ticket gives your guests the opportunity to reserve a parking space for the duration of their stay. All they have to do is fill in the details on the form – a handy parking space will be waiting for their arrival.

What sets us apart?

naviparking®

- We have been operating globally since 2015, with offices in Poland, Dubai and Bahrain.
- We have our own software house and develop products based on clients' experiences.
- We offer comprehensive marketing for ongoing projects, strengthening the client's brand.
- We provide a dedicated account manager for business clients and customer support for individual clients.
- We support smart cities and CSR concepts and create solutions for people with disabilities.
