

# SMART PARKING FOR YOUR COMPANY

A revolution in corporate parking management

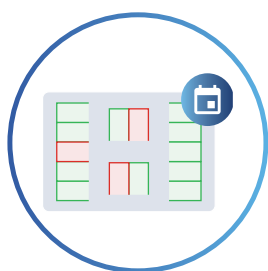

## OPTIMISATION OF PARKING RESOURCES

NaviParking Enterprise offers a flexible solution to the problems associated with the use and management of parking in companies and corporations. We optimise parking processes and monetise unused parking spaces.

## ONE SOLUTION, BENEFITS FOR ALL

Whether you are a car park owner, a lessee or an employee who uses the car park every day, our solution brings real benefits. In creating NaviParking Enterprise, the main objective was to improve the quality of life at work.

### LESSEES

Each lessee can manage their parking resources in real time based on accurate data.

### EMPLOYEES

The intuitive app is convenient to use on a daily basis and offers the possibility to book a space before arriving at work. Employees may share their parking space with other users during their absence.

### OWNER

Access to the management panel guarantees the car park owner optimal use of space and the chance to earn money on unused spaces.

## BETTER ORGANISATION OF CAR PARK TRAFFIC

- Camera-based parking infrastructure.
- Contactless entry/exit with licence plate recognition.
- Clear number of spaces for users and managers.
- App-based emergency entry based on a QR code.
- Reserve a parking space before coming to the office.

## OPTIMISATION OF PARKING SPACES

- Share spaces between lessees of one building.
- Designate user groups with guaranteed access to parking. In their absence, their spaces can be used by other users.
- Optimise employee flow in a limited pool of parking spaces – when a company is working hybrid or has more users than parking spaces.
- Data analysis on the use of spaces by employees over any period.
- Full traffic transparency regarding parking spaces.

## MONETISATION OF PARKING SPACES

- Monetise parking spaces by making them available to external customers.
- Use of the car park after working hours and at weekends.
- Rental of unused parking spaces by the hour.
- Reservations and subscriptions.
- Manage the entry of external customers.
- Full control of traffic in the car park.

## BUILDING UPGRADE TO BREEAM CERTIFICATION REQUIREMENTS

- A smaller carbon footprint.
- Raise the quality of the building to the standards required by BREEAM.
- Improve the standards of service for employees, their comfort and the quality of their work tools.
- Boost the market competitiveness of the building.
- Inclusivity by caring for people with disabilities – a car park without barriers thanks to contactless solutions.

## WHY US?

We are a start-up – flexible and fast.  
We work efficiently.

We will tailor our solution to your individual needs.

We use a modular approach – we add the necessary functionalities step by step.

We have an internal software house, which gives us flexibility and self-sufficiency.

Each deployment has a dedicated project manager.

We advise at every stage of cooperation: from audit to post-implementation product development.
